

April 2009 Construction

The end is in sight after 2 years and 7 months of construction. The college students will be upstairs starting the fall semester. The Cullowhee Kids Preschool will be licensed and on the ground floor. More rooms will be available for Sunday School classes, various programs and groups in our community that use our church. We will have a fellowship hall that can hold everyone at once rather than people being spread out in 3 rooms to eat during church meals. We have built a 10,000 square foot addition, and we are challenged to put it to good use.

The cabinets for the Wesley Foundation kitchen are installed.

The wooden floors in the Wesley lounge and director's office are installed.

Sidewalks in the back of the church are poured.

The steel for the Wesley Walkway is installed.

The main entry way received a cross.

This person was no help at all.

What to expect in May:

- Side walks poured
- Wesley Walkway poured.
- Carpet go down.
- VCT vinyl composition tile installed.
- Block wall started and a fence up.
