

June 2009 Construction Update:

The landscaping block wall is finished and the Walkway Bridge is built.

Members of our El Centro del Señor built the block wall and did a beautiful job.

Robbie takes care of last minute details before the beams are raised in the air.

Notice the metal pillars wrapped in bricks.

The crane helps out.

Joists are up and now the roof goes on.

The roof is ready for shingles. The ground is leveled for sod.

The walls in David's office come tumbling down to make way for the new foyer.

Another mess to clean up.
